

BYOD Printing - Macbooks

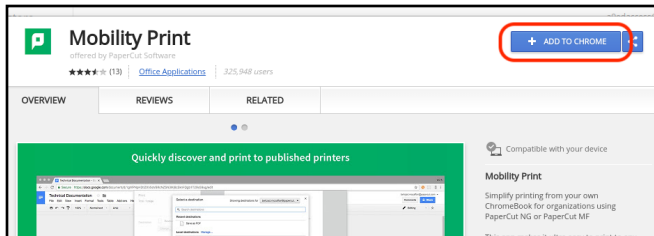

The printing system allows most BYOD devices connected to the school network to print to district provided printers.

When using a Macbook AND connected to the **wps-wlan** network, you can use the printing system via a **Chrome web browser**. You will need to install PaperCut's "Mobility Print" Chrome App.

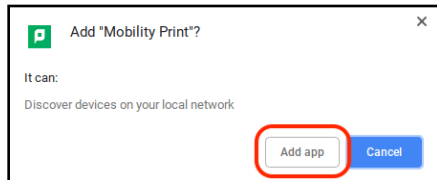

Install the app (if not already installed).

Go to this URL: <http://bit.ly/MobilityPrintApp>

Click on "Add to Chrome"

Click on "Add App" on the next screen.

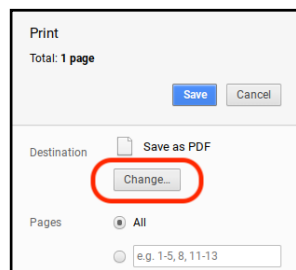

Then, follow Steps 1-6 to print from your personal device.

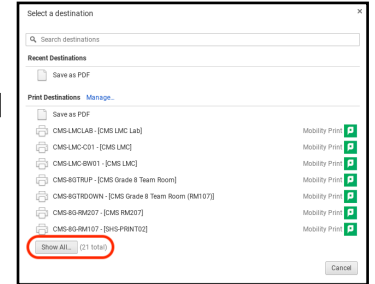

Step 1: Enter Ctrl-P on the keyboard, click File --> Print from the menu or click the Print button.

Step 2: Click the "Change" button to change the printer.

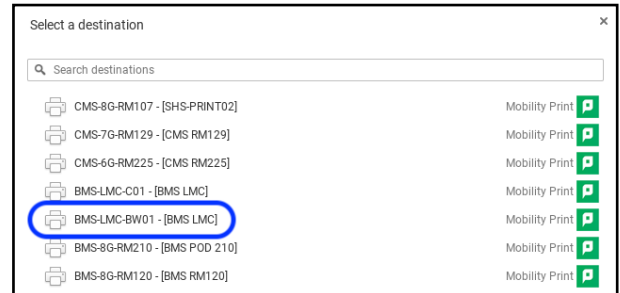

Step 3: Click the "Show All..." button if you need to see more printers.

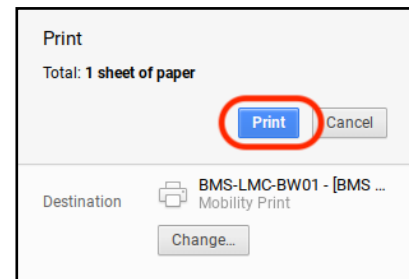

Step 4: Select the correct "Printer Name" from the list.

-- You will only see printers for your current level --

Step 5: Click the "Print" button

Step 6: If prompted, please sign in with your school username & password
