

Macbook Instructions

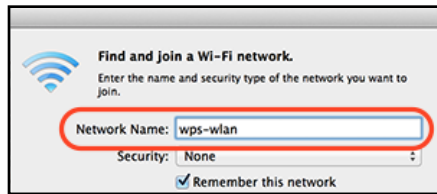

Step 1: Click on the WiFi icon. If necessary, turn WiFi on

Step 2: In the WiFi list, click "Join Other Network..."

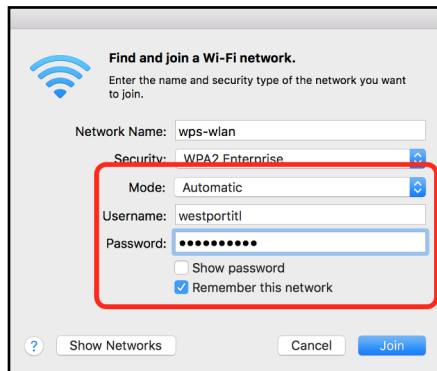

Step 3: Enter "wps-wlan" in the "Network Name" field

Step 4: Click on the "Security" list and select "WPA2 Enterprise"

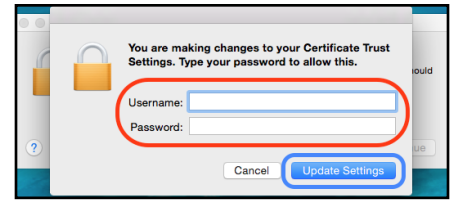

Step 5: Enter your **WPS** username and **password** in the appropriate fields. Leave "Mode" set to "Automatic," and ensure that "Remember this network" is checked. Click "Join"

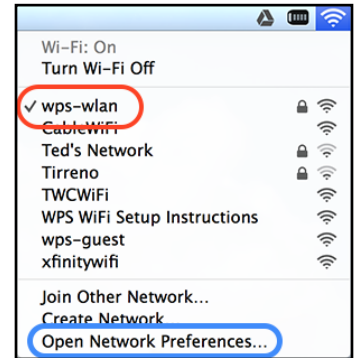

Step 6: If it appears, verify the certificate by clicking "Continue"

Step 7: Enter your computer's admin **Username** and **Password** and then click "Update Settings"

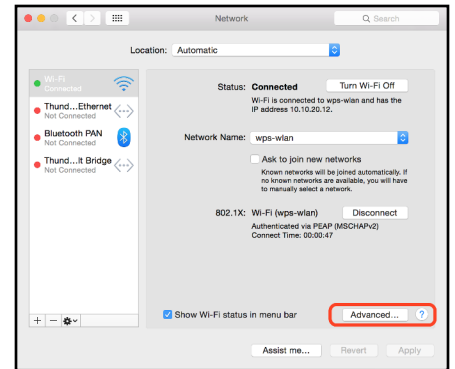

Step 8: Verify that you are connected to "wps-wlan" by clicking on the WiFi icon and observing a check next to "wps-wlan"

Step 9a: If you have previously connected to "wps-guest" or "wps-all-aboard," click "Open Network Preferences..."

Step 9b: In the Network preferences window, click on the "Advanced" button

Step 9c: Remove any of the following networks if found: "wps-guest," "wps-all-aboard", or "WPS WiFi Setup Instructions" by selecting the name and then clicking on the minus or dash button. After removing the network(s), click "OK," then "Apply"
